Allowable Subject Matter

Claims 1-23 are allowed.

The following is an examiner's statement of reasons for allowance:

The prior art taken alone or in combination fails to teach the claimed invention of predicated execution of instructions in processors. In particular, the present invention relates to flexible instruction sequencing and loop control in pipelined loops in, for example, microprocessor. Specifically, claims 1 and 21 are directed towards series of predicate registers switch able between at least respective first and second state and a shifter register designating unit, which designate one, or more predicate register of series to improve high rate of instruction execution for target machines. Therefore, the claimed invention allows individual unit being capable of executing one more instructions in parallel with the execution of instructions by the other execution units to reduce time taken for critical activity by the processor.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Anil Khatri, Primary Examiner whose telephone number is 703-305-0282. The examiner can normally be reached on M-F 8:30-5:00 PM.

The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
